27 February 2012

Dear Mrs Binks

This report outlines your patient feedback from the Improving Practice Questionnaire (IPQ). Your results have been illustrated in tables and graphs with associated benchmarks where applicable. Details of score calculation and statistical methods have been provided to help you in the interpretation and understanding of your results. You will also receive an A4 poster summarising your results and a certificate of completion which you may like to display to patients to indicate that you value their views in order to inform positive change within your practice.

If you are carrying out this survey in order to help meet the requirements of the patient participation directed enhanced service (DES) for GMS contract, a guidance template for discussion of these local survey findings and an action plan have been included which may help facilitate discussions with your patient reference group (PRG).

The format of this report has been updated, which we hope will provide you with a clearer picture of performance.

We hope these results give you useful feedback as to how patients rated the practice and its service, and provide you with a basis for reflection. In order for us to improve our services, we would be very grateful if you could complete and return the enclosed feedback form.

Please contact the office on 0845 5197493 or reports@cfep.co.uk if you require further information about your report.

Yours sincerely

Helen Powell
Survey Manager

Report Contents

Introduction

Your patient feedback

Distribution and frequency of ratings (table 1)	P1
Your mean percentage scores and benchmarks from all participating practices (table 2, graph 1)	P2
Your mean percentage scores and benchmarks by practice list size (table 3, graph 2)	P3
Your patient demographics (table 4)	P4
Your current and previous mean percentage scores (table 5)	P5
Your patient comments	P6

Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies (please see <http://www.cfepsurveys.co.uk/library/publications.aspx>) have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

Overall score	65	73	46	69	73	77	100

Your mean score for this question falls in the highest 25% of all means
 Your mean score for this question falls in the middle 50% of all means
 Your mean score for this question falls in the lowest 25% of all means

* Based on data from 3,027 practices surveyed between April 2008 and March 2011 with 25 or more responses. Please note the reliability of your patient feedback may be marginally reduced if less than 25 patient ratings per question is achieved (see table 1). In the event that there are less than 5 patient responses for any question, the corresponding score will not be illustrated. Please see the supporting documents at the end of this report for percentage score calculation and quartile information.

-- no data available, question introduced in October 2009.

Please note that the scoring scale used to calculate the mean percentage scores was updated in October 2009 in line with feedback from practices and health professionals. This is explained in greater detail in the supporting documentation found at the end of this report. In this report any previous scores displayed will have been calculated using the new scale to be directly comparable with your current scores.

*Dates in the table relate to date of application to carry out the survey.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Comments about how the practice could improve

- Sometimes cannot understand what they are saying. Not very good English.
- Sometimes takes a long time to get through at 9 o'clock. Could do with a thought on this if it could be better.
- Waiting times - have waited for an hour and half on at least two occasions even though I had booked an appointment.
- Patient of same practice for many years - general doctor/patient service very good. Although some receptionists attitude and customer care poor, due to passing ignorant comments when phoning for repeat meds/appointments.
- The only way it can be improved is if the patients with minor complaints such as cold and flus, should treat themselves. Patients to turn up for appointments, and the doctors try a bit harder to keep their schedule.
- The names on the digital display are a good idea, but could be on for another couple of seconds.
- Reception staff are very good.
- I have been in two minds whether to change practices. As I don't feel that the last year or so when I've had an appointment I've been listened to. I have ended up at hospital A and E a few times. I have tried on the last two appointments to be more forth right. I have asked for referrals and not been referred.
- Maybe a background noise in the waiting room for more privacy when speaking to the receptionist.
- Excellent practice.
- Always willing to listen and appreciate your requests if necessary.
- Sometimes takes 10-15 minutes to get through in the mornings on the phone.
- Possibly more magazines in reception (ask public to bring in old magazines to save costs). Be able to make appointments which can be used days in advance - for those that work are not always able to nip out to attend doctors and may need to schedule in time.
- Some reception staff need to smile more.
- Opening times for appointment bookings to be a little earlier (8am-8:30am).
- Great practice couldn't change anything.
- The staff could take more friendly respectful approach to the patients. Very abrupt and sometimes not helpful at all especially in the time needed. Nurses are more than approachable but reception staff lack of customer care and service has a detriment effect on the surgery itself. Also lack of private and confidentiality at desk is absolutely appalling.
- Practice very good.
- By being able to see doctor of my choice.
- The waiting room was a bit cold.
- Regarding the new notice board which advises of the next patient. I didn't hear anything to advise me that there was a notice. There needs to be a louder/dull sound or a flashing light.
- The problem I find within the surgery is it's very hard to see your own GP especially when GP is on holiday.
- Staff very friendly and caring.
- Staff always very helpful.
- Just to make it easier getting an appointment for people who work, no other complaints.
- One thing I seem to find hard is ringing at 9 o'clock, really need to see doctor for tablets needed and by time you get through appointments all gone and end up having to go to walk in doctors in North Ormesby. But now all day appointments given at 9 is making a difference.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Comments about how the practice could improve

- More appointments when you phone up.
- Cup of coffee and a biscuit please.
- Getting appointment on the same day you call the health centre. When you ring 5 minutes after the 9:00am start you can't get in, it's fully booked.
- Keep in time for appointments.
- Telephone. Have to keep pressing redial due to engaged. Hoping to get through for a morning/afternoon appointment.
- No appointments given at times on phone.
- Saturday morning surgery.
- By having more appointments saved for employed people as we only have limited time available to visit the surgery.
- To open til 8pm on some days for shift workers.
- Allow patients to make appointments to see the doctor in advance which will help people who work all the time.
- Everything is ok.
- Practice always very helpful when problems arise.
- Reception staff very helpful, and do a difficult job very well.

Comments about how the doctor/nurse could improve

- Follow up appointments made for patient after reports from specialists have been received to explain decisions.
- Todays visit to doctor was good.
- Doctor was very helpful and considerate of my situation and treatment and I'm very pleased with my visit today.
- Sometimes talks a bit fast.
- All doctors are good, and I feel they don't need to improve at this.
- This doctor is the only doctor I see ever and on their ability, manner, respect and confidentiality I have nothing but true admiration for them. They always treat you as an individual with complete and utter respect.
- The doctor can appear very abrupt at times.
- No, always been satisfied.
- Excellent advice and support.
- Sometimes I feel as if I am being rushed through.
- The doctor needs no improvement.
- Everything is ok.
- This doctor can be abrupt at times.

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 207

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	1	23	83	59	36	5

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(1 \times 0) + (23 \times 25) + (83 \times 50) + (59 \times 75) + (36 \times 100)}{(207 - 5)} = 12,750/202$$

Your mean percentage score for Q1 = 63%

Please note that the scoring scale used to calculate the mean percentage scores was updated in October 2009 in line with feedback from practices and health professionals. Prior to this time a -33 to 100 scale was used, where poor = -33.3333%, fair = 0%, good = 33.3333%, very good = 66.6667% and excellent = 100%.

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

- Lower quartile, below which lies the lowest 25% of the data
- The median, cuts the data set in half
- Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)	Benchmark data (%)*				
		Min	Lower quartile	Median	Upper quartile	Max
Q1 Opening hours satisfaction	63	44	62	66	71	99

* Based on data from 3,027 practices surveyed between April 2008 and March 2011 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided. The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Table 5 lists your current scores for each question together with scores from your last 3 surveys (if applicable) for comparison.

Page 6

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- No-one at the practice will be able to identify your personal responses
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this with a ball point pen. If you change your mind just cross out your old response and make your new choice.

When giving your feedback, please only consider the consultation you have had today.

About the practice

	Poor	Fair	Good	Very good	Excellent
1 Your level of satisfaction with the practice's opening hours	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Thank you for your time and assistance

Guidance template for discussion of local survey findings and action plan for 2011/2012 and 2012/2013

Completing this form will help you meet the requirements of the patient participation directed enhanced service (DES) for GMS contract (April 2011).
Please retain this form for future reference and to present to your PCT if required.

PART 1: 2011/2012

A. Discussion of local practice survey findings

1. Patient reference group (PRG) members present:

2. Practice staff (and designation) present:

3. Please state your key findings from this local survey – look at the report as a whole to include written patient comments in order to obtain a complete picture of performance (see guidance in the introduction of the report).

4. Which responses were most positive?

5. Which responses were least positive?

6. In which areas did you deviate most from the national benchmark? Can you explain why this might be?

7. What are the main priorities identified by the PRG?

8. What are the main priorities identified by practice staff?

B. Action plan: 2011/2012

Which areas did you mutually agree as priorities for action and intervention? Please complete the table below.

Priority for action	Proposed changes	Who needs to be involved?	What is an achievable time frame?

Does your PCT (or similar body) need to be contacted?

(This would only be the case if a practice proposes significant change and PRG agreement has not been obtained. Changes which impact on contractual arrangements also need to be agreed with the PCT).

PART 2: 2012/2013

(To be completed after completion of second survey)

A. Discussion of local practice survey findings

1. Patient reference group (PRG) members present:

2. Practice staff (and designation) present:

3. What activities have you undertaken to address issues raised by your last survey which were deemed as priority by your PRG and your practice staff?

Patient experience issue	What has been done to address this?

4. Do the results of this survey reflect these activities? (Please look at the report as a whole to fully determine this).

5. In which areas have you seen most change?

Last survey (2011/2012)	This survey (2012/2013)

6. What are the main priorities identified by the PRG? (These may be the same as for the last survey or other areas may now be deemed more significant).

7. What are the main priorities identified by practice staff?

B. Action plan: 2012/2013

Which areas did you mutually agree as priorities for action and intervention? Please complete the table below.

Priority for action	Proposed changes	Who needs to be involved?	What is an achievable time frame?

Does your PCT (or similar body) need to be contacted?

(This would only be the case if a practice proposes significant change and PRG agreement has not been obtained. Changes which impact on contractual arrangements also need to be agreed with the PCT).
